

# HY-66 Fiber Endface Repairing Instrument

## Application Fields:

Mainly for repairing the damaged FC/SC pigtail when rectifying and reforming the telecom room

## Performance Features:

### ● Easy to operate

One key operation, completely finishing repairing within 2 minutes, connection holes can repair three optical fiber connectors at the same time.

### ● Saving cost

As fiber connectors plug and pull time by time, end face is susceptible to wear and tear, thus affecting the signal transmission. While the existing solution is to replace fiber pigtails, in order to ensure the normal use. This technology can make patch cords re-grind and re-polish, restoring communication and transport function and saving considerable maintenance costs for operators.

### ● Convenient to carry

Operating box is shockproof & waterproof; easy to carry; 5000mA rechargeable batteries can keep it work over 6 hours.

## Technical Parameters:

Instrument Model	HY-66
Supporting Repairing Connectors	FC/SC fiber connector
Battery Working life(h)	>6
Battery Capacity(mA)	5000
Battery Voltage	12v
Weight (kg)	2.176

### Standard Packaging

Name	Model	Quantity
Fiber Endface Repairing Instrument	HY-66	1pc
400X Video Fiber Microscope	HY-67	1pc
Grinding Fluid	/	1pc
Abrasive Paper	/	10pcs
Adapter	/	1pc
Warranty Card	/	1pc
Manual	/	1pc
Tool Bag	/	1pc

400X video fiber microscope: optional as your request
